

UNIFORM COLOR COMPANY®

*The Perfect Match*

*Featuring the **COLOR TECHNOLOGY™** line of specialty color concentrates*

# CT Frost™ *The Road Less Traveled...*

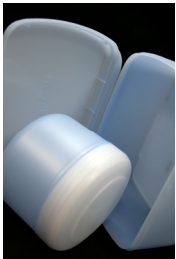

The **CT Frost™** line of color concentrates offers a light diffusing color design simulating the look of frosted glass. This diffusing effect can soften the appearance of a package as well as compliment the color of its contents. From smoky gray to translucent pink, CT Frost™ can be tailored to add depth to any design.

CT Frost™ products can be formulated for varying usage rates depending on the application and resin. Due to their translucent appearance, these formulations are best suited for use in clear or translucent thermoplastic resins. Most CT Frost™ products can be formulated to be FDA compliant.

*Exquisite color can make all the difference. Take the road less traveled and indulge your color in the refined and elegant look of luxury.*

## Design Services

Uniform Color Company can assist you with your color design needs. By visiting our color design center, large projects, requiring several color variations, can be completed in one day. Contact us today to schedule your visit.

## Technical Assistance

Uniform Color Company can assist you with your process troubleshooting needs. With a combined 175 years of plastic processing experience, our staff of Field Technical Service personnel are ready to help you tackle any process problem.

The people who make up the UCC team are committed to working together to deliver products and services of the highest quality to our customers. The passion, creativity and dedication that we foster allow us to provide an unparalleled experience for our customers and to build and sustain a company we are proud of.
