

Soft & Elegant

Color & Effects

Frost

The frost line of color masterbatches offers a light diffusing color design simulating the look of frosted glass. This diffusing effect can soften the appearance of a package or perform a light diffusing function. Frost can be tailored to add depth to any design or application.

Application Suitability

Polymer:

Transparent or Near Transparent Grades (Clarified PP, PET, PMMA, SAN, PC, GPPS, Transparent ABS)

Applications:

Packaging & Containers, Housewares, Lighting, Sporting Goods, Jewelry, Toys, Lenses, Medical, Nutraceuticals, Cosmetics

Processing:

Accurate dosing system and adequate cycle time are recommended to ensure uniform color distribution

Color+™ Options:

Indirect Food Contact or FDA requirements, UV Absorption to protect the contents, Low Usage Rates, or a Touch of Sparkle.

Expect:

High Clarity, Low Haze Colors. High Chroma to Whisper-Tint Colors. Loading should be adjusted for part thickness.
