

See The Light

Glow

Color & Effects

are used for their novelty or for their ability to illuminate entirely free of energy. Going far beyond the instantaneous edge glow or black light glow typical of optical brighteners and fluorescent pigments, UCC's Glow-in-the-Dark masterbatches can radiate light for hours after the light source is removed. Glow-in-the-Dark masterbatches glow in various shades ranging from blue, aqua, green, and red. These masterbatches can be tinted to impart a subtle shade under normal lighting.

Application Suitability

Polymer: Transparent or Near Transparent Grades (Clarified PP, PET, PMMA, SAN, PC, GPPS, Transparent ABS)

Applications: Packaging & Containers, Housewares, Lighting, Sporting Goods, Jewelry, Toys, Lenses, Medical, Nutraceuticals, Cosmetics

Processing: Accurate dosing system and adequate cycle time are recommended to ensure uniform color distribution. Machinery must be purged very well prior to use.

Color+™ Options: Daytime Colors

Expect: Choose from fast charging or long glow time varieties. High usage rate (10+%) is often required to achieve desired results.
